

SHOWER GLASS INSTALLATIONS

DISCLAIMER FOR DRILLING DOWN

Olympic Glass finds it necessary to advise our customers that in some circumstances it may be necessary to drill downwards in order to install various types of shower enclosures. We cannot guarantee that the liner or membrane will not be penetrated; although we prefer not to do so. Olympic Glass will do everything possible to prevent perforating the water barrier. Olympic Glass will do everything possible to ensure proper sealing for the holes at the shower pan curb, but cannot be held responsible for possible leaking based on the fact that we must drill down to install the enclosure. Therefore, we must advise our customers that we will not be held responsible for damage. This includes any installation delays, all costs incurred, including parts and labor, to replace.

Acceptance of the associated quote indicates your understanding of this policy. Thank You.
